PAMIRA – Climate Protection Certificate 2014

Dear Mr. Restivo,

The PAMIRA system allows a sustainable and environmentally friendly use of the collected used packaging. Thus a significant contribution is achieved to reduce emissions provided by greenhouse gases and to protect the environment. For the very first time this was documented by the Award of a Climate Protection certificate for PAMIRA 2012.

In 2014 again a Climate Protection Certificate is awarded, which we attached hereby. The figures for the Certificate were confidentially calculated by the Trustee for PAMIRA. The Climate Protection Certificate is based on CO₂ balancing developed by the Fraunhofer Institute for Environmental, Safety and Energy Technology UMSICHT based on the ISO standards 14040 and 14044.

In this Certificate the achieved CO₂ savings are quantitatively expelled and converted into the number of trees to illustrate that the trees bind corresponding quantities of this greenhouse gas emissions per year.

Best regards

Dieter Koeve
Attorney at law
As Trustee for the
PAMIRA-Rücknahmesystem

Climate Protection Certificate 2014

Società Chimica Larderello s.p.a.

has consigned packaging to recovery through RIGK GmbH in the year 2014.

Your contribution to climate protection:

By consigning this material to recycling,
19.665 kg greenhouse gas was saved in absolute terms.*

This corresponds to the greenhouse gas emissions which
1.417 trees in Europe bind every year.

On behalf of the climate and the environment we say „Thank you“.

A handwritten signature in blue ink, appearing to read 'D. Koeve'.

Dieter Koeve
Trustee for PAMIRA
